## Front-End Web Development

### Education:

#### **University of Michigan – Ann Arbor Campus Class of 2015**

##### **College of Literature, Science and the Arts**

##### **Major: Bachelor of Science (B.S.) in Biopsychology, Cognition, and Neuroscience (one Major)**

I attended the University of Michigan for undergraduate studies, beginning in 2011 and finishing in 2015. My GPA was a 3.48. My courses were mostly science-related, but I also took math courses, literature courses, and courses that were in small discussion groups. Originally I was in the Honors College, but did not finish with the Honors degree because I did not do a thesis. I enjoyed the community at U of M and learning from professors as well as students. I did some extracurricular music activity, such as cello lessons from a student in the music school, and I played in the Campus Symphony Orchestra (CSO) as the second-principle cellist.

#### **Lahser High School - Bloomfield, MI. Class of 2011 Graduate.**

Though no longer existent because it combined with the other public high school in Bloomfield, MI, I graduated from here in 2011 with a 4.0 GPA and multiple AP classes. My strong suits were mathematics, literature, and music (I played the cello).

### Work History:

#### **1) Whole Foods Market - Cashier**

I was a cashier in the Store Support/Front End department of a large Whole Foods Market grocery retailer. The store is located in Birmingham, MI. We were responsible for managing a large volume of customers, ensuring that they had a decent experience. My specific responsibilities were operating the till, operating the computer screen and POS software, exchanging money, giving instructions to customers, having conversations with customers, bagging, retrieving bags, and various other issues that came about related to the exchange of Whole Foods Market products. It was both an individual and team effort.

#### **2) City of Auburn Hills - Fieldstone Golf Course - Golf Course Pro Shop Worker and Starter Crewmember**

This was a job working at a well-known public golf course in Auburn Hills, MI. We had a large and volume of clientele all the way until early December, when we closed the course for the winter. I began doing basic golf-cart cleaning and stowing, once the clients were finished with their rounds. We also organized carts in the morning for golf clubs, made sure the driving range was properly arranged, and retrieved driving range golf balls with a motorized retrieving cart. Later, I was asked to do some work in the pro shop, where I would answer calls for clientele, schedule tee-times on a computer, sell merchandise (mostly clothing and golf balls), and manage a cash register.

#### **3) State of Michigan Department of Natural Resources - Pontiac Lake State Recreation Area - Park Maintenance Crewmember**

At this position, I was responsible for reporting to the Park Rangers (basically DNR police officers) for various maintenance tasks around the 3,745 acre park. The park was very busy during the summer months. We sometimes walked along the beachfront property and picked up litter, emptied trash barrels, cleaned bathrooms, watched out for illegal park activity (i.e. no alcohol is permitted at this park), painted various objects, such as doors, trimmed trees, weed-whacked, and operated motor vehicles such as pick-up trucks and 4x4 vehicles.

#### **4) Self-Employed - Math and Science Tutor**

I served as a math and science tutor in exchange for an hourly or half-hourly wage. I worked with high school students, mostly freshmen and sophomores. I tried to assist them with their daily homework and clarify any confusion about their course lessons. The courses were Geometry, Algebra, and Biology mostly.
